## Education

**Bachelor of Computer Science**  
**Higher Institute of Computer Science and Multimedia of Sfax**

September 2021-2024

**Tunisian baccalaureate diploma**  
**Secondary school November 15, 1955**  
BAC Technique 2021

## Professional experience

### Stage : MTD GROUP

Samsung's project: creation of a pre-order website for their new high-end products.  
Sfax -1 month

### Stage : Primatec Engineering

Create a desktop application to automate the extraction of raw data from test guides and integrate this data into Jira tickets. Design and implement a robust software solution that efficiently parses test guides, extracts relevant information, and seamlessly updates Jira tickets with this data. This application should handle various test guide formats, ensure data accuracy, and streamline the process of data integration into Jira. By automating these tasks, the application will significantly reduce manual entry errors and save considerable time, ultimately enhancing productivity and allowing teams to focus on more critical tasks.  
Sfax -4 months

### Experience : Tester

I have six months of experience as a Tester and Validation Engineer at Primatec Engineering, a journey I am still continuing. Working in a dynamic environment has improved my communication, teamwork, and adaptability, while also strengthening my technical skills. I gained knowledge of CAN, LIN, and Ethernet networks and worked with tools like Jira, Test Guide, and Wireshark. I also developed automation skills and learned new programming languages through workshops on ISTQB, Python, and Linux. This experience has given me a strong understanding of automotive testing, ECUs, and protocols like SOME/IP and DoIP, making me skilled in automotive validation.

## Skills

### • Programming Languages :

Python ,PHP ,Javascript, C, JAVA, Type script

### • Développement web & Frameworks:

Flask,CakePHP, Angular, Reactjs ,Flutter ,ANDROID,HTML, CSS,Bootstrap, Django , Laravel

### • Methodologies and Architectures:

Processus Unifié ,UML ,Méthodologie Agile : Scrum
